RESPONSE TO APPLICANT'S AMENDMENT

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 08/23/07 has been entered.

Claims 29-34, 36-64 are pending.

*Claims 29-34, 36-64 read on the method for ameliorating the effects of inflammation in a subject comprising administering an antibody specific for GM-CSF to a subject are under consideration in the instant application.*

2. It is noted that applicant's request to correct the inventorship has been granted. Ian Campbell has been added as an inventor.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112.

*The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.*

4. Claim 42 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 42 recites the limitation "inflammation". There is insufficient antecedent basis for this limitation in the claim, since the base claim 29 recited "chronic inflammation".

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

*The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.*

Art Unit: 1644

6. Claims 36-64 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. **This is a New Matter rejection.**

Newly added 36-64 represent a departure from the specification and the claims as originally filed and applicant has not pointed out where the support come from. In particular, for the claimed subject matter in claims 36, or 40, 41, 44, or 46 etc.

Applicant is invited to clearly point out the written support for the newly added claims, for example for claims 36, or 40, 41, 44, or 46, etc.

7. Claims 29-34 are allowed .

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michail Belyavskiy whose telephone number is 571/ 272-0840.
